- Figma, Confluence

HOBBIES

- Yoga
- Cooking

PROFILE

I am a skilled application developer specializing in React, React Native, Node.js and Android. With expertise in React Hooks, Redux, Webpack, npm, and Babel. I bring a strong problem-solving mindset and a commitment to delivering exceptional user experiences. Known for working effectively both independently and within teams. My track record reflects a dedication to designing and implementing high-quality web and mobile applications.

EXPERIENCE

Frontend Developer
Vira.AI Oy September 2023 - February 2024

A Virtual Recruitment Assistant Chat App.

- Developed and maintained the user interface of Vira.AI using React against REST API, ensuring a seamless and intuitive user experience.
- Collaborated seamlessly with cross-functional teams to deliver high-quality frontend solutions.

Full-Stack Developer (Meteor Framework)
Unfair Advantage Oy June 2023-Aug 2023

A online digital platform to connect people through communities, sport clubs and events.

- Developed and maintained the sports network website using Meteor Framework (React, Node, MongoDB).
- Implemented responsive and real-time features.
- leveraging Meteor's built-in reactivity and WebSocket integration.

Mobile Application Developer
Freelancer January 2021- June 2023

- Developed pharmaceutical Android applications utilizing Android SDK.
- Translated business requirements into well-crafted UI solutions.
- Optimized performance to ensure scalability and a seamless user experience.

Web and Mobile Application Developer
Web & App Creations September 2017 - Jan 2021

- Supported entire applications lifecycle (concept, design, test, release and support)
- Troubleshoot and debugged to optimize performance.
- Designed the interfaces to improve the User experience.

Work

[Vira AI](#) A personal Virtual Recruitment Assistant Chat App

- React app with Contact request, application form, and Interview modules.
- Backend managed user and bot messages, rendered dynamically with typewriter effects.
- Utilized reusable components, styled themes, and responsive design with error handling for enhanced UI/UX.

[Sports Network](#) Sports Teams Creation And join tribes of sports

- App featuring 'My Availability for the Next 7 Days' functionality on user profiles.
- Integrated 'My Friends' Availability' feature and component to display availability status.
- Enhanced 'All Tribes' page with modifications in features and UI for improved user experience and interaction.

[Local Solicitors](#) Find Local Solicitors App

- Next.js web app for finding local solicitors, offering search, filter, and sorting functionalities on the 'Find Solicitors' page.
- Integrated Material UI for sleek UI components, ensuring a seamless and visually appealing user experience.
- Implemented Google APIs for precise location mapping on detailed solicitor pages, enhancing user engagement and providing accurate information.

[GharPedia](#) Home Interior Design And Renovation App

- App's landing page developed using React.js with GraphQL APIs for data retrieval.
- Featured navigations, a blog page, home design gallery with sliders, animations, and a calculator page.
- Implemented authentication functionalities including login, signup, and logout features for user management.

[EmedStore](#) Online Pharmacy App

- Implemented user authentication and account management functionalities for personalized experiences.
- Product listing and detail pages, cart functionalities, third party integration for payment gateway.
- Included features such as order tracking, notifications for order status updates, and a user-friendly cart management system.
